CMSI 4072 Project Status Sheet

Fall 2026

Name: August Wetterau   Date: 2/24/26

Project: Drift   Period Covered: Week 7

Accomplishments since last report:

• Finished baseline UI (home, scenario, conversion view, and scoring view)

• Connected HUME EVI 3 and figured out how to create sessions

• Planned out future UI and a few scenarios to implement

Scheduled tasks to be done by next report:

• Connect Authentication for account creation

• Update UI to be responsive with simple animations and colors

• Connect gemini for scoring of conversations

Implement 2-3 scenarios to test

Noteworthy risks, concerns, or problems:

• HUME EVI 3 costs money every minute. To help, I can create many free accounts (which allow 5 min of free time per month), or contact HUME directly for free educational credits
